DRIVEN, COHESIVE, STRONG

iSystems Group, at our core, we are a group of people committed to providing our customers with affordable, high quality IT Services. We bring ideas to fruition. We provide IT solutions which help our clients realize IT goals, reduce cost and increase revenue. Our team is comprised of experienced, cleared staff with more than 20 years of government information technology and contracting experience. Our status as a Service-Disabled Veteran-Owned Small Business allows government agencies to obtain our services in an expeditious manner and can assist them in meeting annual SDVOSB contracting goals.

OUR TEAM

The iSystems team is a group of talented, experienced, and dedicated professionals supporting their clients by creating innovative solutions to solve business challenges. The team's experience spans across the Federal and commercial landscape, including: Department of Defense, Department of Justice, Intelligence Community, civilian agencies, and commercial enterprises. iSystems Group's core competencies include Portfolio, Program, and Project Management, Operations & Maintenance, Full Life Cycle Software Development, Technology Solutions, and Managed Services.

Our President and CEO, Norman Fortier is a CISM, CGEIT, PfMP, PgMP, PMP® credentialed, hands-on manager, with a proven history of managing large-scale IT Business Units, National Security Assets, and Enterprise Programs. Most of our staff are credentialed Project Management Professionals (PMPs) with extensive experience in building and managing programs and projects. Aligning this capability with decades of work experience in specialized fields such as data management, virtualization, and training, gives iSystems the ability to provide a comprehensive approach to your business problems.

INTELLIGENCE COMMUNITY AND CIVILIAN AGENCIES

Portfolio Management and Information Security

- Developed and implemented Information Security enterprise-wide Portfolio and Project Management framework.

Acquisition Support

- Provided full acquisition lifecycle support duties in accordance with FAA Acquisition Management System (AMS) and Procurement guidance

Strategic Planning, IT Governance

- Assisted a Federal Agency to establish an Enterprise Planning Process including strategic planning and IT alignment & governance, strategic goal development and portfolio management.

Enterprise PMO Initiation & Sustainment

- Multiple agency (DoJ, Civilian) experience establishing, and managing PMOs. Defined EPMO goals & objectives. Developed policies and procedures, portfolio, and project management. Developed processes for performance measurement, financial management, schedule management, earned value, quality standards, risk management and configuration management. Developed related templates and artifacts.

Project Management, Mentoring & Training

- Support various agency training initiatives including DoJ, FAA, and FRTIB with certified Senior-level Federal Acquisition Curriculum (FAC) for Program/Project Managers (P/PM) and Microsoft Project Instruction

SharePoint and Tableau

- Extensive experience developing SharePoint and Tableau reporting dashboards, data collection, workflows, business process reengineering

Program Evaluation

- iSystems conducted an in-depth review of Cost, Risk, Earned Value, Schedule, and Technical aspects (CREST) for several Customs Border Protection (CBP) programs. Conducted follow-on workshops mentoring project managers

Enterprise Engineering, Data Warehouse and Big Data Support

- Technical leads delivering systems engineering support in the areas of GOTs support, data analytics, data normalization and data engineering (ingest/ETL)

Cloud Migration

- iSystems first within the FAA to migrate a key enterprise application to a FedRAMP certified cloud provider.
